

# WE MOVE THE BEARING WORLD

## PORTFOLIO

# more than 25 years of

We have been working successfully in the national and international rolling bearing business since 1991. Our partners, who have been authorized and certified for many years, fully contribute to the satisfaction of our customers.

Our experience and competence makes us your ideal partner for all aspects of drive technology.

Visit us at [www.sgn-waelzlager.de](http://www.sgn-waelzlager.de)  
and of course personally in the  
Bauhausstadt Dessau.

QUALITY IS OUR DRIVE

# certification / quality

Since May 2004 we are a company certified by TÜV Nord GmbH according to DIN EN ISO 9001.

Post audits take place regularly, the last in March 2019.

All our European suppliers are also certified at least according to DIN EN 9001.

# sales assortment

Our portfolio includes the following articles:

- Angular contact ball and spindle bearings
- Radial and axial spherical roller bearings
- special antifriction bearings
- deep groove ball bearings
- self aligning ball bearings
- cylindrical roller bearings
- railway vehicle bearings
- needle roller bearings
- slewing ball bearings
- cross roller bearings
- taper roller bearings
- linear technology
- Clamping and withdrawal sleeves
- Shaft seals and round rings
- Rolling bearing accessories
- Chains and sprockets
- spherical bearings
- retaining rings
- plain bearings
- lubricants

# mechanical and plant

SGN Wälzlager GmbH supplies a large number of large-diameter antifriction bearings manufactured in German, Czech, Slovakian and Italian plants for use in machine and plant construction. These mainly include radial and axial spherical roller bearings, cylindrical and tapered roller bearings, slewing ball bearings and cross roller bearings.

Constant innovations and product enhancements give us and our customers the opportunity to reliably solve short- and long-term drive technology problems.

## application:

- steelworks
- crane systems
- conveyor systems
- construction machinery
- paper industry
- cement industry

## products:

- taper roller bearings
- cross roller bearings
- self aligning ball bearings
- cylindrical roller bearings
- slewing ball bearings

# gearbox manufacturing

We supply rolling bearings to a wide variety of gear manufacturers throughout Germany and parts of Western and Eastern Europe. These include manufacturers of helical and bevel gearboxes, worm gearboxes, gear and coupling gearboxes.

The most diverse types of ball and roller bearings are used here, with sheet steel or brass cages, as well as special designs according to special customer requirements.

## application:

- Crane and conveyor systems •
- marine transmission •
- wind power •
- automotive •

## products:

- taper roller bearings •
- spherical roller bearings •
- cylindrical roller bearings •
- Radial and axial ball bearings •

# mining industry

For many years we have been supplying a wide range of rolling bearings and accessories for machines and plants in the maintenance sector of fossil fuel conveyors. Mainly spherical and cylindrical roller bearings as well as ball bearings are used. Short access times to our warehouse in Dessau and the warehouses of our manufacturers allow our customers flexibility and short downtimes for pending repairs.

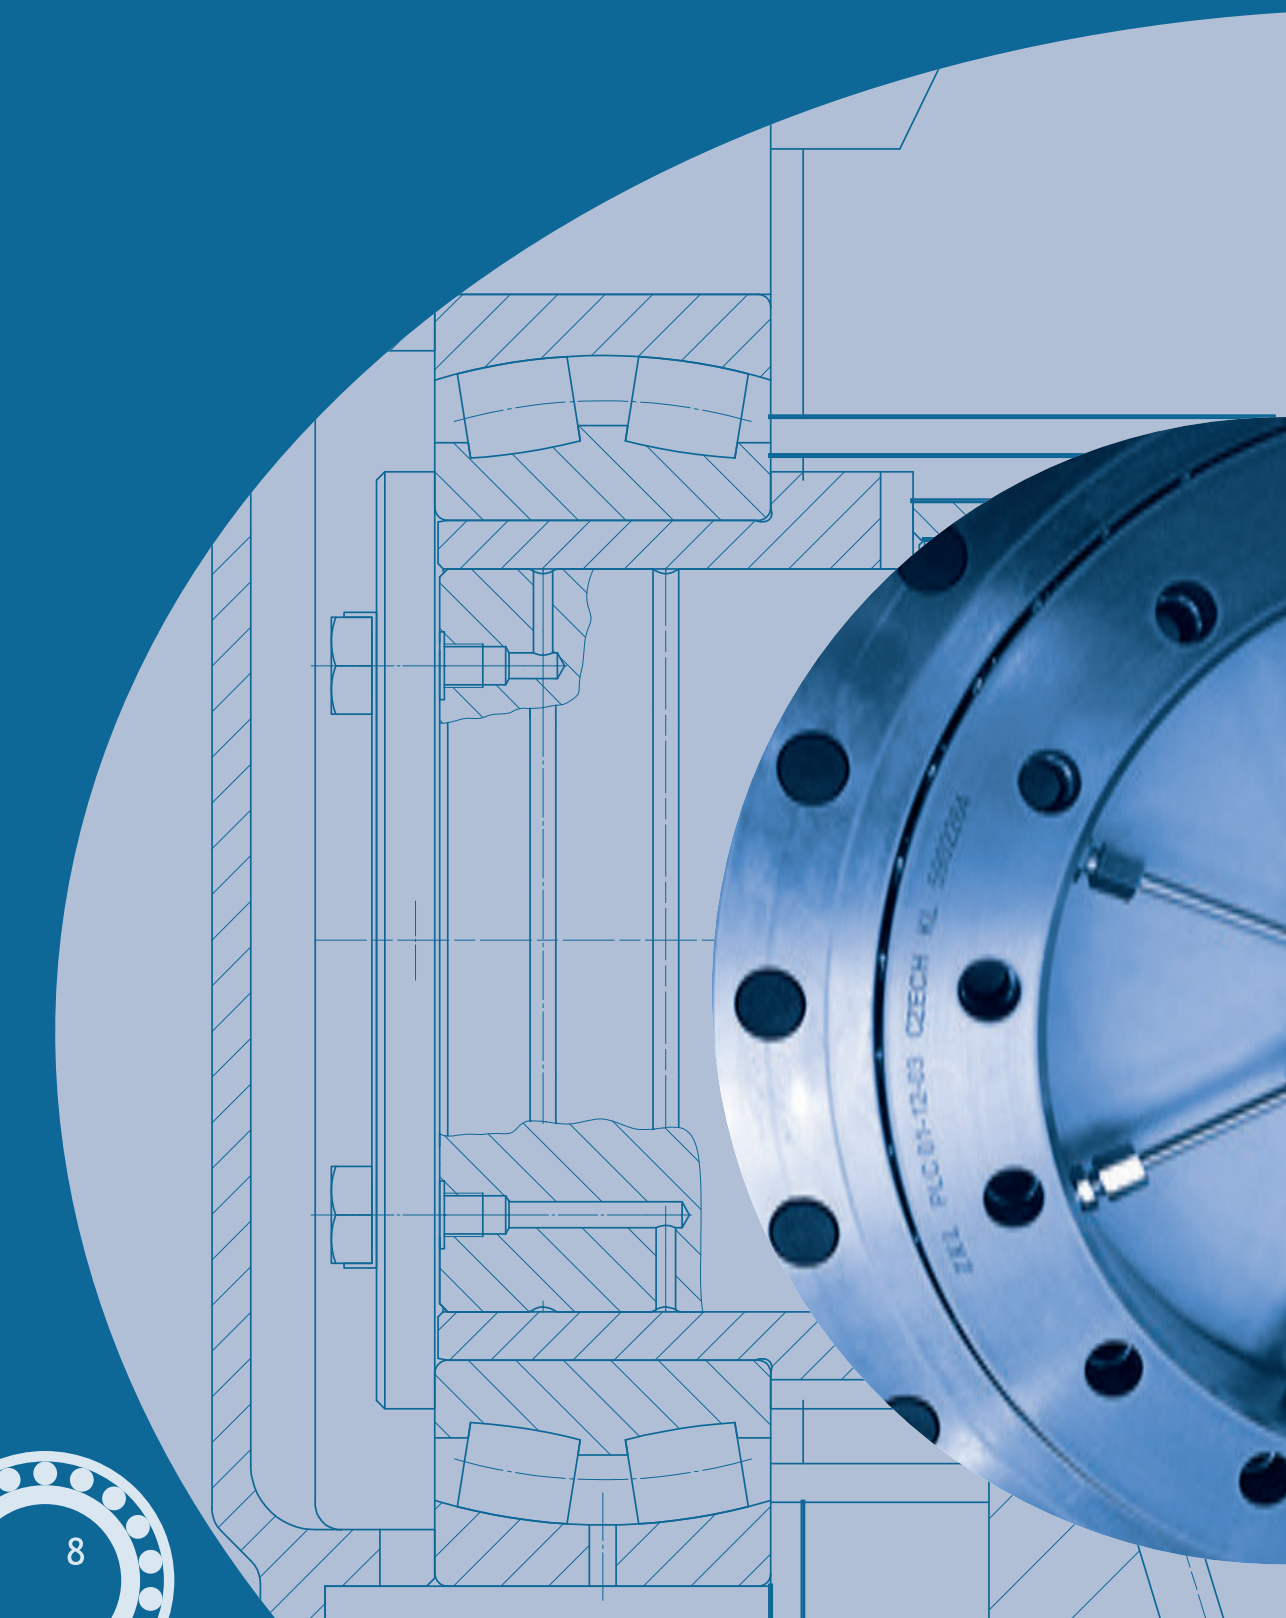

# custom made products

The continuous expansion of our cooperation with selected European manufacturers enables us to manufacture a wide range of special bearings in cooperation with our customers. This also includes the reconditioning of various large antifriction bearings.

For all European products you will receive on request a long-term supplier declaration / proof of preference according to EG 1207/2001.

# premium class rolling bearings

Parallel to our own brands, we are an authorized DV-B, NKE and EVO distributor. In addition, we also offer our customers SKF, FAG & INA premium bearings, which we purchase exclusively from authorized trade partners.

You can also use our worldwide contacts for the procurement of other brands such as Timken, Rollway, NSK, NTN, NACHI as well as our long-standing trade relations with China.

## expansion of product range

We also supply chains, sprockets, V-belt pulleys and taper bushes from well-known manufacturers.

Due to increased demand, we also offer our customers linear technology components such as linear bearings and linear units, profiled rail guides as well as ball and roller monorail guidance systems.

# other industries

All our products are used in various industrial and service sectors. Qualitatively always oriented towards the premium manufacturers of the world market, we supply the following industries, among others:

**Energetics - Pharmaceutical industry - Paper industry - Agricultural technology - Mechanical and plant engineering - Food industry Mining - Electrical engineering - Conveyor systems and hoisting gear construction - Special machine construction - Steel works Railway industry**

# reach us...

In recent years, we have continuously developed, invested a lot in our family-run company and our employees. State-of-the-art office equipment, software and warehouse technology ensure smooth processes in the processing of all customer requests.

You have questions, suggestions or need technical support... we are at your disposal at any time - true to our motto; we are turning for you. Please get in touch with us.
